

EE-463 Laboratory Regulations

- The ultimate purpose of the laboratory is to give you the training and set of skills to be an independent experimenter in power electronics area. Do not expect lab sessions where you merely follow the instructions written on a paper.
- Safety first! Please follow the general rules of electrical safety at all times. Any reckless operation that risks the safety of you and others will be penalized.
- Morning groups start at 9:00, afternoon groups start at 13:40.
- There will be a quiz before each lab session, so please arrive on time. You will not be accepted to the lab session, if you arrive later than the quiz is finished.
- Grade distribution is as follows:
 - Quiz 30%
 - Performance 40%
 - Report 30%
- You will perform the labs with random partners at each session
- Topic coverage of quizzes: you should expect questions from the topics you have recently covered in 463 class, i.e. do not confine yourself to the lab manual only.
- Active participation is strongly encouraged.
